

How to Vote in the Online General Election 2025

The following instructions explain, step by step, what you need to do in the electronic voting system for the General Election 2025. You may change your vote at any time until the election closes.

1. Step: Open a private browser (recommended)

Before starting, open your web browser in **private or incognito mode**. This helps protect your privacy while voting.

2. Step: Log in

Go to the official online voting website: XXX.com and log in using the details you were given. Follow the on-screen instructions carefully.

3. Step: Have you voted before?

You will be asked if you have already voted in this election.

- Select **No** if this is your first time voting.
- Select **Yes** if you want to change a vote you already submitted.

4. Step: Select pictures from previous voting

If you selected “Yes”, the system will show you a set of pictures.

- Select **all the pictures you saw** when you voted before.
- This includes pictures from both successful and unsuccessful voting attempts.
- Any pictures you saw before must be selected to continue.

If you do not select the correct pictures, your vote will not be updated. The system will not tell you if your selection is correct, for security reasons.

5. Step: Voting

Select a voting option, check your choice carefully, and submit the vote.

6. Step: Vote identifying picture

After you submit your vote, the system will show a picture.

- This picture allows you to change your vote later using *Step 4*.
- The picture does not show which option you voted for.

For security reasons, please do not save this picture.

Why are you asked to confirm prior voting and select pictures?

The voting system allows you to change your vote while keeping the election secure. Selecting the images ensures that you were present when casting prior votes and hereby can update a vote accordingly to your new preference.
